When you're thinking of putting a website online, or even if you have one already, you need to be sure you choose the right people to help you. And you have to be sure that your website is hosted in the right environment.

rante

But how do you choose who to help you do that?

Are you sure they have the experience, resources and technical knowledge to help you deal with your specific needs? Are you sure they have the ability (and desire) to help with any issues at the time 'you' need it and care about what you are actually trying to do? Are you sure you're going to get a service that's worth the money you pay for it?

Whoever you are, if you're serious about your website, make sure you've got the rights host behind you
